Description

Mouse-pad Dynamic is a futurist wrist rest mouse pad which doesn't keep still on the desk but **moves together with your hand**.

For the first time ever **your advertising is moving on the desk!**

With Mouse-pad Dynamic you are no more obliged to keep changing your hand and wrist position because the mouse-pad follows you, furthermore, it is an ideal promotional item because **your message is never hidden by the hand**, as it happens with the traditional mouse-pads, because the mouse-pad and wrist rest move together with the mouse. Even if you don't use a mouse-pad any more, you need a wrist rest in order to avoid the "mouse-pain" and prevent RSI ([Repetitive Strain Injuries](#))
